

# SAVE VALUABLE TIME

## ASSISTED TRANSCRIPTION WITH COMMANDCENTRAL EVIDENCE

The audio and video technology that makes it easier to document an incident and quickly solve cases also generates an overwhelming amount of recorded information. From body-worn and in-car video footage to interview and video surveillance recordings, all of this information needs to be quickly reviewed, understood, and potentially shared for use in court.

CommandCentral Evidence provides all the tools agencies need to securely and electronically store, manage and share digital evidence. One of the capabilities included with CommandCentral Evidence Plus is assisted transcription, which helps agencies find key moments in video evidence quickly, without the need to watch or listen to video and audio in real time.

### PROTECT YOUR PEOPLE

Automating transcription reduces your staff's exposure to potentially disturbing content.

### PROTECT YOUR TIME

Automatically transcribe audio and video files in bulk, eliminating manual file transcription cost and saving time.

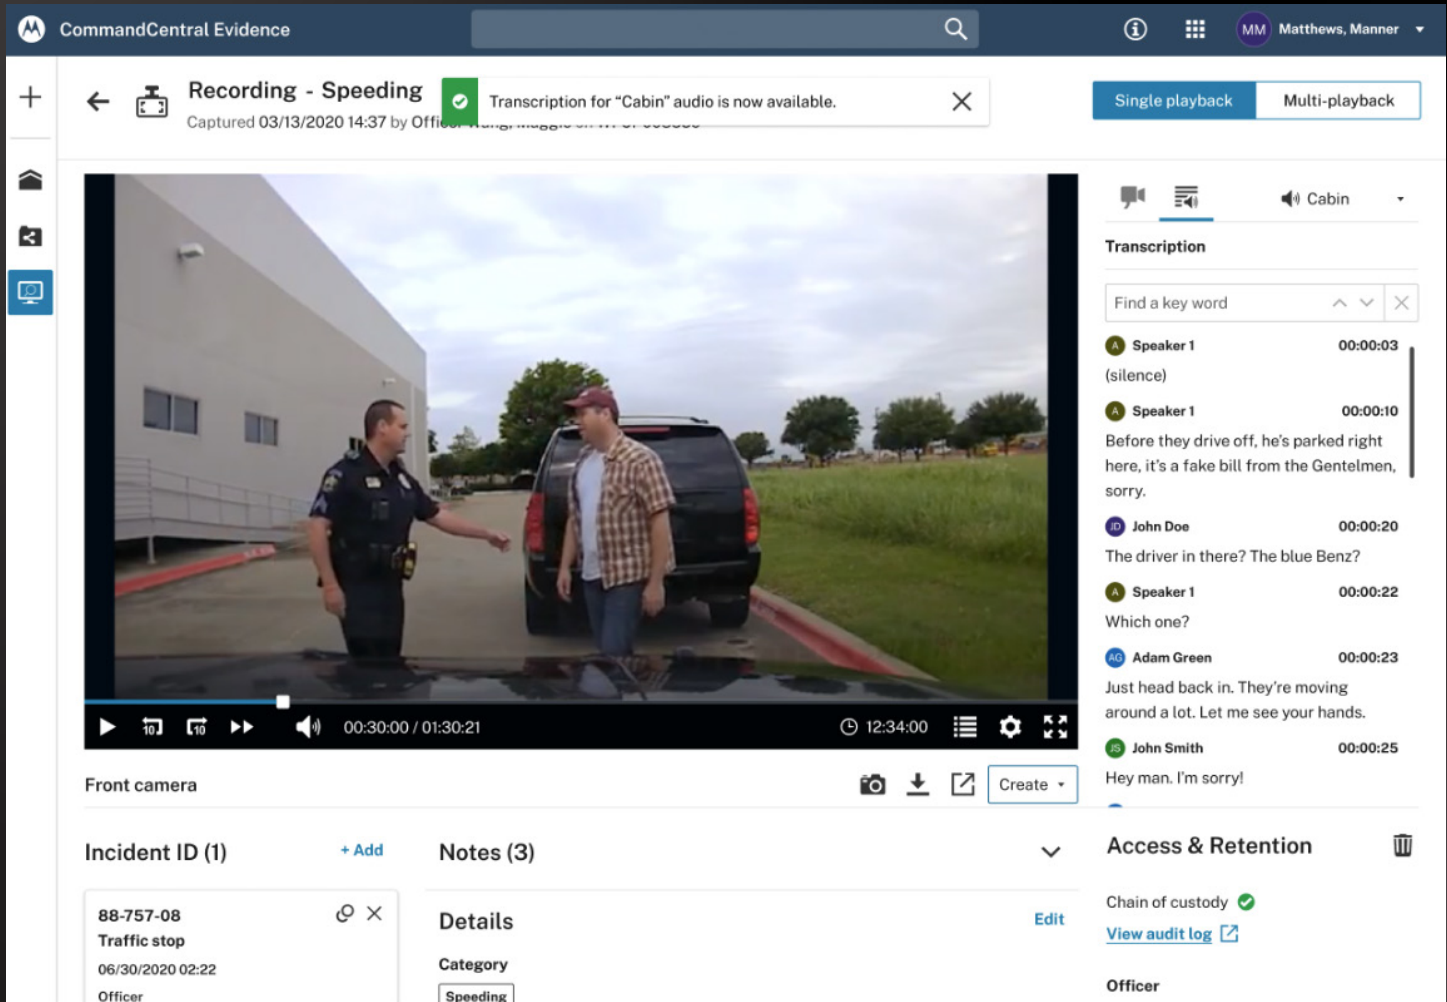

### PROTECT YOUR EVIDENCE

Transcription is fully integrated with the CommandCentral Evidence audit log and includes the transcription event, any changes made and if the transcript is shared.

# KEY FEATURES

## SIMULTANEOUS SOURCE VIEW

The original source material plays alongside the transcript, making it easier to review key moments and gain additional context.

## LOCATE IMPORTANT MOMENTS

Search for keywords or select a section of the transcript to jump to the exact footage you need.

## EASILY FOLLOW ALONG

As the recording plays, the corresponding section of the transcript is highlighted, making it easier to track and also identify corrections if needed.

## SEPARATE MULTIPLE SPEAKERS

The transcript identifies when there are multiple speakers based on their unique voices and separates their lines of the transcript.

# TECHNICAL SPECIFICATIONS

Deployment	PC with Google Chrome and high bandwidth internet connection
Supported Containers for import	MP4
Video codecs	H.264
Audio codecs	AAC
Internet bandwidth	10 Mbps minimum, 30+ Mbps recommended
General Desktop Specs	No server needed
CPU	Quad-core processor (optimal - 6 core vCPU)
RAM	16 GB+ ; 32 GB+ for larger projects
Recommended screen resolution	1080p
HD	128 GB+
GPU	Integrated GPU (2019+)

## CJIS COMPLIANCE & SECURITY

Assisted transcription is designed to CJIS Security Policy requirements. With a dedicated team of CJIS compliance professionals, Motorola Solutions provides CJIS compliance support to our customers by administering and coordinating personnel credentialing, providing assistance with documentation in support of CJIS audits and advising on how to configure and implement our solutions in a manner consistent with CJIS Policy.

## TRANSCRIPTION IS JUST THE BEGINNING WITH COMMANDCENTRAL EVIDENCE PLUS

Just as transcription can be a manual and time-consuming process for agencies, so can collecting and uploading evidence, redacting video, and sharing files. CommandCentral Evidence Plus was designed to bring all of the digital evidence management tools you need into one platform, for one price, under one subscription. Community engagement tools, a mobile application for your officers, digital evidence management software, native redaction, and a dedicated sharing page for prosecutors are all included. Transform your workflows with robust, end-to-end digital evidence management.
